Ashoka x Changemaker Companies

Freelance Brand & Product Designer

January 2022 - July 2023 (1 year 7 months)

Paris, Île-de-France, France

In 2022, I had the incredible opportunity to work as a Freelance Brand/Product Designer for a significant rebranding project for Changemaker Companies, an initiative by ASHOKA. I was a key contributor to a cross-functional team, working alongside exceptional professionals such as Suzanne Brady (ASHOKA), an entrepreneurial project manager, Maylis Trassard (ASHOKA - Changemaker Companies), a project driver with a keen eye for design, and

Olga Skoczylas (Cultural Design), a skilled Cultural Economist, Researcher, and Product Designer.

My role in the project involved a range of responsibilities. I was entrusted with the creation of an engaging, fresh brand identity that aligned with the organization's vision and mission, yet elevated its stature to the level of its corporate partners. This entailed numerous intricate tasks, from brainstorming creative ideas to meticulously refining design elements and delivering final outputs.

The result of our efforts was a revitalized brand that far exceeded our initial expectations. The new brand was well-received by all stakeholders and has played a pivotal role in reinforcing Changemaker Companies' commitment to positive change in society. This project was a testament to the power of collaborative creativity, trust, and respect in creating a brand identity that resonates deeply and broadly.

It was a great experience to be part of Verimi, together with Core.se, and MVPFactory.Co. Verimi seems to aim of becoming the lead in trust and digital security platform in DACH, and judging from the team, and from the already build a product, they are already there. I am proud to have reshaped the core of the App, for all mediums, Desktop, Mobile, iOs, and Android. I solved together with Core Team and with Humboldt University IT Security & Privacy Team, complex UX solutions and designed for the future expansions of the platform. Verimi is one of the most daring and visionary projects I've been part of so far.

I have managed to differentiate the brand from its competitors in Switzerland and Germany. I have led behavioural in-context research; analysed, synthesised, and organised research data into meaningful themes, categories, and visually compelling frameworks or behavioural models for application design recommendations to cross-functional teams and senior clients. I have rebranded and created digital and print libraries.
